Parents are becoming increasingly concerned about today's technology. Guest speaker Anastasia Goodstein has recently published a book that will help you understand the computer and cell phone activities of our kids. Highly tuned into the pulse of this group, she explores both the benefits and drawbacks of its use. More importantly, she will show parents how to "take the plunge into cyberspace" to help keep kids safe and to build closer relationships!

Co-sponsored by The Lake Forest District 67 APT Parent Awareness and The Lake Forest Library.
